IN ASSOCIATION WITH

WELCOME TO THE

RESEARCH-A-THON

ONLINE ORIENTATION SESSION

Congratulations on being selected for Research-A-Thon 2026,
organized by the IEEE Student Branch, NIET

By

RITIKA SRIVASTAVA

(IEEE Student Branch -NIET)

ABOUT RESEARCH-A-THON

Research-A-thon is an inter-college Research Hackathon designed to promote innovation, analytical thinking, and academic excellence among students. Inspired by the format of a traditional hackathon, this event challenges participants to explore real-world problems through research and review-based solutions.

The competition provides a structured platform where students collaborate in teams, develop research ideas, receive expert mentoring, and present their work before an academic and industry panel. The event encourages participants to transform theoretical knowledge into practical insights and impactful solutions.

Research-A-thon is conducted in four progressive phases, ensuring systematic development of ideas from concept to final presentation.

Our Core Team

Event Flow of 18 September, 2025

PHASE 01

REGISTRATION & VERIFICATION

(8:15 AM – 9:00 AM)

- Participant & Team Verification
- ID Card & Team ID Check
- Verify all Team Members
- Issue / Confirm Team IDs
- Complete Registration Formalities
- Submission of Required Forms
- Provide Poster Materials

NOTE: All participant details will be verified through the official confirmation mail.

PHASE 02

WELCOME & ORIENTATION

(9:00 AM – 10:00 AM)

- 09:00 – 09:30 AM | Welcome & Inauguration
 1. Welcome of Participants
 2. Introduction to IEEE
 3. Introduction to Research-A-Thon
 4. Inauguration Ceremony
- 09:30 – 10:00 AM | Guidelines Session
 1. Explain Complete Event Guidelines
 2. Research Paper Writing Process
 3. Evaluation Criteria
 4. Plagiarism Guidelines
 5. Submission & Round Procedures

Event Flow of 18 September, 2025

PHASE 03 RESEARCH PAPER WRITING & EVALUATION

(10:00 AM – 12:30 PM)

10:00 AM – 11:30 PM | Research Paper Writing

- Research Paper Writing Begins
- Continuous Mentor Rounds by our mentors

11:30 PM – 12:30 PM | Evaluation Round 1

- Evaluation Round 01
- Jury / Judges Evaluation
- Initial Assessment
- Poster making also

NOTE: Side by Side you have make the Poster also.

PHASE 04 FINAL EVALUATION & PLAG CHECK

(01:30 PM – 04:30 PM)

1:30 PM – 2:30 PM

- Research Paper Writing — Resume

2:30 PM – 4:30 PM

- Evaluation Round 02 (02:30 -03:30 PM)
- Plagiarism Check
- Final Evaluation
- Plagiarism Criteria: 5%–10%
- Shortlisting for Final Round
- Poster making also
- 03:30-04:30 PM

NOTE: Plagiarism Check is important for shortlisting for final round.

Research Paper Presentation

1. Title :

The title should clearly communicate the research topic.

- Participants should explain:
- What the research is about
- The main area/domain
- What specific problem or application the research addresses

Example: “AI-Based Crop Disease Detection Using Deep Learning”

Explain briefly: This research focuses on using deep learning to automatically identify diseases in crops from leaf images.

2. Abstract :

The abstract is a short summary of the entire research paper.

It should cover:

- Background/context
- Problem
- Objective
- Methodology
- Key results or expected results
- Conclusion/impact

Participants should not simply read the abstract. They should explain the research in their own words.

Research Paper Presentation

3. Introduction :

The introduction establishes the background of the research.

Explain:

- What is the broader topic?
- Why is this area important?
- What is currently happening?
- What problem exists?
- Why does this problem need to be addressed?

A good introduction should naturally lead to the research problem.

4. Problem Statement :

This is one of the most important parts.

Participants should clearly answer : “What exact problem are we trying to solve?”

The problem statement should be:

- Specific
- Clearly defined
- Relevant
- Researchable
- Avoid making it too broad.

Weak: “Climate change is a major problem.”

Better: “Existing crop monitoring approaches often fail to provide timely identification of crop stress at field level, creating a need for an automated early-warning approach.”

Research Paper Presentation

5. Research Gap :

Participants should explain what is missing in existing research.

They should answer : “What have previous researchers done, and what is still missing?”

For example:

Existing methods have limited accuracy.

Existing studies use limited datasets.

- A particular region/population has not been sufficiently studied.
- Existing systems are computationally expensive.
- Multiple relevant parameters have not been integrated.
- This section demonstrates that the research has a reason to exist.

6. Objectives :

Clearly state what the research aims to achieve.

Usually 2–4 objectives are enough.

For example :

- To develop an ML-based prediction model.
- To compare different algorithms.
- To evaluate model performance.
- To develop a practical decision-support system.

Each objective should connect directly to the research problem.

Research Paper Presentation

7. Research Questions / Hypothesis :

If applicable, participants should explain the research questions.

For example:

RQ1: How accurately can machine learning predict crop disease?

RQ2: Which model provides the best performance under the selected conditions?

If the research uses a hypothesis, explain:

- What is being tested?
- What relationship/effect is expected?

8. Literature Review / Existing Work :

Participants should briefly discuss important previous studies.

They should explain:

- What previous researchers have done
- Methods/models used
- Important findings
- Limitations
- How their research differs

There is no need to explain every paper included in the literature review.

Research Paper Presentation

9. Proposed Methodology :

- This is where participants explain how they conducted or plan to conduct the research.
- A flowchart is highly recommended.
- For a technical project, it could look like:

Data Collection → Data Preprocessing → Feature Extraction → Model Development → Training → Testing → Evaluation → Results

10. Dataset :

For technical research, participants should be prepared to explain:

- Dataset/source
- Number of records/images
- Features/variables
- Classes/categories
- Data collection period, if relevant
- Training/testing split
- Data preprocessing
- Any limitations or biases

If the dataset is publicly available, mention the source.

11. Algorithms / Technical Approach :

If ML/DL is used, participants should understand their model rather than simply naming it.

They should be able to explain:

- What algorithm was used?
- Why was it selected?
- How does it work at a high level?
- What are its important parameters?
- What alternatives were considered?
- Why was this approach appropriate?

12. Implementation :

- If the research has been implemented, mention:
- Programming language
- Libraries/frameworks
- Software/tools
- Hardware/environment, where relevant
- Model architecture
- Training process
- Number of epochs
- Batch size
- Evaluation procedure
- Don't overload the PPT with code. Explain the approach, not the entire code.

Research Paper Presentation

13. Results :

- This is one of the most important sections.
- Participants should clearly show what their research produced.
- Depending on the project, results could include:
 - 1.Accuracy
 - 2.Precision
 - 3.Recall
 - 4.F1-score
 - 5.RMSE
 - 6.MAE
 7. R^2
 - 8.Confusion matrix
 - 9.ROC-AUC
 - 10.Graphs
 - 11.Tables
 - 12.Maps
 - 13.Statistical results
 - 14.Comparative results
- Most importantly, don't just show a graph—interpret it.

14. Conclusion :

- The conclusion should answer the original research problem.
- It should briefly state:
 - 1.What was done?
 - 2.What was found?
 - 3.What was achieved?
 - 4.What is the significance of the research?
- Avoid introducing completely new information in the conclusion.

15. Limitations :

Participants should honestly acknowledge limitations.

Examples:

- Limited dataset
- Limited geographical coverage
- Computational constraints
- Small sample size
- Limited number of classes
- Lack of real-time data
- Model generalization limitations

Mentioning limitations does not weaken the research; it demonstrates awareness of the scope of the study.

Research Paper Presentation

16. Future Scope :

- Explain what can be done next.
- For example:
 1. Larger datasets
 2. Real-time implementation
 3. Integration with IoT
 4. Deployment as a web/mobile application
 5. Testing in different geographical regions
 6. More advanced models
 7. Integration with additional parameters
- Future scope should logically follow from the limitations and findings.

18. References :

- Participants should provide the major sources used in their research.
- References can include:
 1. Research papers
 2. Journals
 3. Conference papers
 4. Government datasets
 5. Official reports
 6. Reliable websites/documentation
- Use a consistent citation style such as IEEE format if specified by the organizing committee.

GUIDELINES FOR SELECTED TEAMS

All selected teams are requested to carefully read and follow the guidelines below. The event will be conducted over 17, 18, and 19 September 2026.

1. ORIENTATION SESSION – 17 SEPTEMBER 2026

- Attendance at the Orientation Session is mandatory for all Selected teams.
- All team members are required to attend the online session.
- The orientation will provide participants with important information regarding the event structure, evaluation process, rules, timelines, poster preparation, presentation requirements, and other instructions.
- Participants are advised to carefully note all instructions given during the orientation.
- Any queries regarding the event procedure may be clarified during the orientation session.
- Further instructions related to Day 1 and Day 2 will also be communicated during this session.

2. DAY 1 – 18 SEPTEMBER 2026 | RESEARCH DEVELOPMENT & POSTER PREPARATION

REGISTRATION & REPORTING :

- All selected teams must arrive at the venue by 08:15 AM.
- Team members must report to the designated registration desk upon arrival.
- Registration and attendance verification will be completed before the commencement of Research-a-thon.
- All participants must carry their valid college/institute ID cards for registration and verification.
- Participants are requested to arrive on time to ensure that the event begins as scheduled.
- Research-a-thon activities will commence after the registration process and opening instructions.

GUIDELINES FOR SELECTED TEAMS

RESEARCH DEVELOPMENT :

- The Selected teams will participate in the Day 1 research activities.
- Teams will develop and refine their research work based on the abstract submitted during the selection process.
- Participants will be required to work on their research problem, methodology, analysis, findings/expected outcomes, and future scope.
- Teams will prepare a research poster as part of the Day 1 activities.
- Participants must bring their own laptops, chargers, stationery, and any other resources required for research and poster preparation.
- Teams must ensure that the content of their research work is original and properly referenced.

3. DAY - 1 | EVALUATION

- The research work and poster developed by each team will be evaluated by the designated evaluation panel.
- The evaluation will be conducted according to the criteria communicated by the organizing committee.
- Based on the Day 1 evaluation, the Top 10 teams will be shortlisted for the final round.
- The shortlisted teams will be announced as per the schedule communicated by the organizing committee.
- Poster making side by side will be also there.

4. DAY 2 – 19 SEPTEMBER 2026 | FINAL PRESENTATION & JURY EVALUATION

- Only the Top 10 teams shortlisted through the Day 1 evaluation will proceed to the final round.
- The shortlisted teams must report at the venue at the designated reporting time communicated by the organizing committee.
- All team members must be present for the final round.
- Participants must carry their valid college/institute ID cards.
- Each shortlisted team will present its research work before the jury panel.

GUIDELINES FOR SELECTED TEAMS

FINAL PRESENTATION

Each shortlisted team will be required to present:

1. PowerPoint Presentation (PPT)
2. Research Poster

- The PPT and poster should represent the research work developed during Research-a-thon.
- The presentation should clearly cover:
 - Research Problem
 - Objectives
 - Methodology
 - Data/Analysis, wherever applicable
 - Results/Findings or Expected Outcomes
 - Future Scope
 - References
- All team members should be prepared to explain their contribution and answer questions from the jury.
- The presentation must strictly follow the time limit allotted by the organizing committee.
- The jury may ask questions related to the research problem, methodology, results, technical approach, and future scope.
- Final evaluation will be conducted by the jury based on the criteria communicated by the organizing committee.
- The final results will be announced as per the official event schedule.

GENERAL GUIDELINES FOR RESEARCH-A-THON 2026

1. DRESS CODE :

- Formal dress code is mandatory on both Day 1 and Day 2.
- Participants are expected to maintain a neat, professional, and presentable appearance throughout the event.
- Participants should avoid casual attire during the event.

2. IDENTIFICATION & REGISTRATION :

- All participants must carry their valid college/institute ID cards.
- ID cards may be checked during registration and at different stages of the event.
- Participants must ensure that the details provided during registration are accurate.

3. PUNCTUALITY & ATTENDANCE :

- Participants must strictly follow the reporting times communicated by the organizing committee.
- All team members are required to attend the Online Orientation Session on 17 September and the activities applicable to their team on 18 and 19 September.
- Late arrival may result in delays in registration or participation in scheduled activities.

GENERAL GUIDELINES FOR RESEARCH-A-THON 2026

4. EQUIPMENT & MATERIALS :

Participants should bring:

- Laptop
- Laptop charger
- College/Institute ID card
- Required stationery
- Research-related material and references
- Any other resources required for PPT / poster preparation

5. ACADEMIC INTEGRITY :

- All research work must be original and appropriately referenced.
- Plagiarism or submission of copied content is strictly prohibited.
- Any violation of academic integrity may lead to disqualification from the event.

EXTERNAL PARTICIPANTS GUIDELINES FOR RESEARCH-A-THON 2026

- All external participants must carry a valid College/Institute ID Card and a duly signed HOD Consent Form from their respective institution.
- All team members are required to attend the Orientation Session on 17 September 2026.
- Participants must report at the venue by 08:15 AM on 18 September 2026 for registration and attendance verification. Research-a-thon activities will commence after registration.
- Formal dress code is mandatory on both days of the event.
- Participants must carry their laptop, charger, stationery, and other materials required for research and poster preparation.
- Refreshments will be provided to registered participants at the designated refreshment area. Lunch will not be provided; participants are requested to make their own lunch arrangements.
- Participants must maintain punctuality, discipline, and professional conduct throughout the event and follow all instructions given by the organizing committee.
- All research work must be original and properly referenced. Plagiarism or copied content may lead to disqualification.

DISCIPLINE GUIDELINES FOR RESEARCH-A-THON 2026

1. DISCIPLINE & CONDUCT :

- Participants must maintain professional and respectful conduct throughout the event.
- All instructions given by the organizing committee, coordinators, volunteers, and jury members must be followed.
- Participants must not disrupt the activities or proceedings of the event.
- Participants are responsible for their personal belongings.
- Any form of misconduct or violation of event rules may result in disqualification.

2. IMPORTANT :

- The selected teams must attend the Orientation Session on 17 September 2026.
- Day 1 begins with registration at 08:15 AM on 18 September 2026.
- The selected teams will participate in Day 1 activities and evaluation.
- The Top 10 teams will be selected based on the Day 1 evaluation.
- The Top 10 teams will present their PPT and research poster before the jury on Day 2, 19 September 2026.
- Participants are advised to remain attentive to all official announcements and instructions throughout the event.

We wish all the selected teams the very best for Research-a-thon 2026.

**IEEE Student Branch – NIET
Research-a-thon 2026 Organizing Committee**

Thank You
